I. READING COMPREHENSION (12 marks)

1. A test that tells you how long you will live for is to go on sale in Britain this year. The £435 blood test will offer the alluring possibility of estimating your lifespan. Some scientists said the test could also provide insights into a range of age-related disorders like Alzheimer's and cancer. Others, however, have already raised questions about ethical issues.

2. Researchers working on the technology said they would be able to read a person's 'biological age' by the length of structures on the ends of a person's chromosomes, called telomeres. They believe telomeres are an important indicator of the speed at which a person is ageing. Several studies have
